

UX Designer Job Description

We are looking for a skilled UX Designer who has a focus on end-user ease of use and functionality of the application. The UX Designer will work with designers and trend analysts to develop applications that reach as many users as possible.

To be successful as a UX Designer you must have expert skills in back-end development as well as a good knowledge of new tools and trends in the industry.

UX Designer Responsibilities:

- Create user-friendly applications.
- Work with designers and engineers to brainstorm application ideas.
- Reflect on data to analyse trends.
- Create test models to gauge user enjoyment.
- Must be good in designing

UX Designer Requirements:

- A Bachelor of Science degree in Computer Science or Engineering.
- Proficient in ADOBE XD, ZEPLIN, Corel draw, SharePoint
- Excellent communication skills.
- The ability to interpret analytics and implement changes to applications as needed.

Work Experience:

- 5 – 10 years of relevant experience.
